## INSTRUCTIONS FOR USE

### APPLICATION

Thoroughly clean the surface from dust, and any dirt. Protect the surrounding area that you do not want to paint. Shake very well before use for at least 3 minutes after the mixing ball is heard. During the first use, spray in the air for 3-4 seconds to remove any sediment from the valve. Check the product on a testing surface. Spray the object you want to paint from a relatively close distance of 4-5cm with the white valve or 8-10cm with the black one. During spraying, you firmly move the container alongside the sprayed surface. shake the container regularly, for best results apply 2 layers, waiting 3-5 minutes between them.

**The optimal use temperature is 10°C - 25°C.**

### AFTER USE

Spray holding the can inverted for 3''. Clean the caps with solvent.
